

The new INject line was developed to offer cost effective hot runner systems granting at the same time good quality and performances:

#### MAIN FEATURES

- Robust design
- Easy assembling
- Easy maintenance
- Designed for polymer commodities (PP, PE, PS, ABS, ASA, SAN, EPDM)
- Designed for prototype tooling
- Not suitable for high aesthetical parts

#### MAIN SOLUTIONS FOR INject SERIES COST REDUCTION:

- Simplified components geometry
- High standardization
- Easier technical solutions than HRS standard line
- Limited product range
- Jacket heaters
- Simplified working flow
- Simplified manufacturing process
